

Gauge Plug and Probe System

Vaetrix Gauge Plug® and Gauge Probe® Fittings have been an industry standard since their invention in 1958 by Julian Taylor. This system provides the most reliable method of quick gauge integration and sampling in the world. The easy to use slip-on / slip-off operation will endure any field environment for millions of cycles without repair or maintenance.

VAETRIX....
LIQUID LEVEL
& MEASUREMENT DEVICES

Servicing the oil and gas industry worldwide for over 50 years, providing our customers with reliable pressure devices at competitive prices.

VAC TO 2,200 P.S.I.

MINI GAUGE PLUG

The 1600 Series Mini Gauge Plug System is offered in Lock-On type and is used in taking pressures and samples as well as calibrating or testing the accuracy of fixed pressure gauges or meters.

VAC TO 5,000 P.S.I.

VAC TO 15,000 P.S.I.

1600 SERIES

LOCK-ON or SLIP-ON GAUGE PROBE

The 1600 Series Gauge Plug and Probe System is offered in both Slip-On and Lock-On type and is used in taking pressures and samples as well as calibrating or verifying the accuracy of pressure gauges or meters.

VAC TO 5,000 P.S.I.

VAC TO 15,000 P.S.I.

1600 SERIES
LOCK-ON GAUGE PLUG

Used in taking pressures and samples as well as calibrating or verifying the accuracy of fixed pressure gauges or meters.

Gauge Plug and Probe System

Vaetrix eGauge2

Liquid Level Indicator

Accuracy.

Quality.

Simplicity.

ELECTRONIC GAUGES

Gauge2

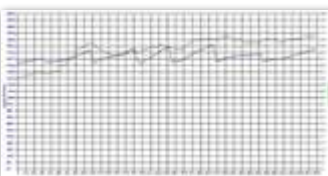

VAETRIX GAUGE 2

The Gauge 2 accuracy is guaranteed better than 0.1% for any reading in the device's range. The Gauge has proven itself in harsh environments under rugged handling as an accurate field survey gauge.

APPLICATIONS:

A master calibration standard for the instrument department. A traveling pressure standard for field inspectors or technicians. A precision test device for use in industrial and research applications. A precision pressure instrument for testing, setting, calibrating or repairing pressure measurement devices.

Has Data logging capability

Taylor e-Chart

VAETRIX eGAUGE 1

Easy configuration, large view area with back light capability & state-of-the-art silicon water technology was selected for its characteristic stability and repeatability.

APPLICATIONS:

Hydrostatic testing, well shut in, flow testing, testing of valves, well injection, ammonia fertilizer plants, and steam plants electrical plants, slick line and wire line.

Gauge Case

Vaetrix Gauge Case

We offer a protective case with a foam insert that will help protect your Gauges. This case will help keep your Gauges from getting damaged or scratched during transport.

Vaetrix eGauge2

The 3" diameter pressure gauge consists of a stainless steel construction with three selectable measurement units. A back light is installed for easy viewing in low lighting conditions. It is designed for use in valve repair shops, laboratories and plants of all types. Precision measurement, performance and reliability are coupled with consistent accuracy to meet today's demanding service needs.

eGauge2

Vaetrix Liquid Level Indicator

The Model 140-LLI displays the level in a tank by sensing the head pressure and converting it to movement of a pointer on a fixed scale, continuously indicating liquid level in an atmospheric (vented) vessel.

Because of its unique design, the Model 140-LLI has a long service life with minimal maintenance requirements.

140-LLI

Gauge4

VAETRIX GAUGE 4

Designed especially to deliver superior performance under tough working conditions, the Gauge 4 combines reliable microprocessor-based technology with rugged design to bring portable, precision electronic pressure measurement performance to field-testing. This means Gauge 4 operators can count on benefiting from high accurate pressure measurements.

The state of the art electronics and software inside the Gauge 4 are every bit as advanced as the lightweight and functional package they are housed within. Its built in calibration and diagnostic programs make the Gauge 4 the most reliable instrument of its type in service today.

VAETRIX eGauge3

The eGauge3 is the culmination of over 30 years of design, innovation, engineering and manufacturing digital pressure gauges for the oil and gas industry.

It's unmatched performance, solid construction, accuracy and distinctive design set this gauge apart from any other pressure gauge on the market. The gauge is more durable and reliable than the most expensive mechanical pressure gauges manufactured to date.

APPLICATIONS:

Hydrostatic testing, well shut in, flow testing, testing of valves, well injection, ammonia fertilizer plants, and steam plants electrical plants, slick line and wire line.

Has Data logging capability
